Grey reflective tape with good retro-reflective performance is best suited for HiVis vests, jackets, pants etc. It is made with 100% polyester backing and micro-beads layer on the surface. Retroreflection of micro-beads provides better safety for the workers. Available in 1", 2", 3", 4" width.

XM SilverLine Reflective tapes and films will have longer life if you follow our care instructions.

Type of work environment, exposure conditions and maintenance have an impact on reflective performance.

Please test each tape according to appropriate care instructions required for the garment.

High-visibility clothing made with reflective material should be maintained in good condition and inspected regularly for damage or deterioration.
